План

- 30 июня 2021 вышел новый Journal Citation Reports с обновленными значениями импакт факторов, квартилей и других показателей.
- Новая метрика Journal Citation Indicator, которая, в отличие от импакт фактора, рассчитывается для всех журналов Web of Science Core Collection.
- О чем говорят данные метрики?
- Как можем использовать JCR для анализа изданий для публикации?
- Какие журналы есть по моей теме?
- Как сохранить такой список?
- Какие журналы моей страны есть в данном списке?
- Где посмотреть импакт фактор и квартиль?

Новинка

The screenshot displays the Clarivate Journal Citation Reports interface. At the top, the Clarivate logo is on the left, and 'Products' is on the right. Below this, the page title 'Journal Citation Reports' is followed by 'Browse journals' and a user profile for 'iryna.tykhonkova@clarivate.com'. A central modal dialog box is open, titled 'Welcome to the new Journal Citation Reports'. The dialog contains the following text: 'We are excited to show you what is new in this year's Journal Citation Reports. You'll find:'. It lists three key features: 'More journals' (expanded content to include Arts & Humanities and Emerging Sources Citation Index journals), 'Journal Citation Indicator' (a new field-normalized metric for journals across all disciplines), and 'Enhanced user experience' (interactive visualizations, simpler navigation, and contextual help). At the bottom of the dialog, it says 'Let us show you around!' and provides two buttons: 'NO THANKS' and 'GET STARTED'. Below the dialog, a banner asks 'Already have a manuscript?' and offers a 'Match my manuscript' button. A search icon is visible in the background.

Welcome to the new Journal Citation Reports

We are excited to show you what is new in this year's Journal Citation Reports. You'll find:

- **More journals** - we've expanded content to include Arts & Humanities and Emerging Sources Citation Index journals
- **Journal Citation Indicator** - a new field-normalized metric for journals across all disciplines
- **Enhanced user experience** - interactive visualizations, simpler navigation and contextual help make the JCR easier to use than ever.

Let us show you around!

NO THANKS GET STARTED

The screenshot displays the Clarivate Journal Citation Reports website. At the top, there is a black navigation bar with the Clarivate logo on the left and a 'Products' menu on the right. Below this, a white header contains 'Journal Citation Reports' and a 'Browse journals' link. On the right side of the header, a user profile icon is shown with the email 'iryna.tykhonkova@clarivate.com'. The main content area has a purple background. A large white search bar is centered, with the placeholder text 'Type journal name, ISSN, eISSN, category or a keyword' and a magnifying glass icon. To the left of the search bar, the text 'The world's leading publisher-' is partially visible. A white modal window is overlaid on the search bar, titled 'Expanded search' and labeled 'STEP 2 OF 6'. It contains the text 'Search journal names, categories, keywords, or ISSNs to begin your search.' and a 'NEXT' button. At the bottom of the page, a white banner features a document icon, the text 'Already have a manuscript? Find relevant, reputable journals for potential publication of your', and a 'Match my manuscript' button. A question mark icon is visible in the bottom right corner of the page.

The screenshot displays the Clarivate JCR interface. At the top, a search bar contains the text "Type journal name, ISSN, eISSN, category or a keyword" and a magnifying glass icon. A modal dialog box is centered on the screen, titled "STEP 5 OF 6 More features are coming soon". The dialog text reads: "Browse by category, publisher and country will be added in upcoming releases. If you're looking for something that isn't yet available in the new interface, you can return to classic JCR at any time." Below the text are "BACK" and "NEXT" buttons. The background interface includes a "Match my manuscript" button and a "search" label. At the bottom, four navigation options are shown with icons and labels: "Browse journals", "Browse categories" (with "COMING SOON" below it), "Browse publishers" (with "COMING SOON" below it), and "Browse countries" (with "COMING SOON" below it).

Можно ли поработать в старом интерфейсе

ДА!

The image displays two screenshots of the Clarivate InCites Journal Citation Reports interface. The top screenshot shows a dark header with the title 'InCites Journal Citation Reports' and the Clarivate logo. Below the header, a message states 'We're building the new Journal Citation Reports.' followed by a button labeled 'Click here to access the preview'. A large blue double-headed arrow points from this button down to the bottom screenshot. The bottom screenshot shows the 'old' interface with a white header containing 'Journal Citation Reports' and 'Browse journals'. The main content area has a purple background with the text 'The world's leading journals and publisher-neutral data' and a search bar. A right-hand sidebar menu lists various products, with 'Journal Citation Reports & Analytics (Classic)' circled in blue. At the bottom, there is a section for 'Already have a manuscript?' with a 'Match my manuscript' button.

'Michelangelo's Panel': Content, Context, and Vasari's Buonarroti Altarpiece

Sally J. Cornelison

From November 2017 until November 2018, Giorgio Vasari's (1511–74) *Christ Carrying the Cross* (1568–72) on the altar of the Buonarroti Chapel in the Florentine church of Santa Croce received an unprecedented amount of attention when visitors to the Franciscan basilica looked on as it was restored in situ (plate 1).¹ Time, insect infestations, and the Arno River flood of 1966 had all taken a toll on the large panel, whose surface was cracked and unstable and obscured by layers of grime, previous restorations, and yellowed varnish. Its recent conservation has revealed a bright palette dominated by pinks and blues that Battista Naldini (c. 1537–c. 1591) later complemented in the frescoes he executed for the wall monument to the right of the altarpiece (1564–78) that commemorates Michelangelo Buonarroti (1475–1564) (plate 2). Vasari and members of Florence's Accademia del Disegno (Academy of Design) produced Michelangelo's cenotaph, and together it and the altarpiece comprise the Buonarroti Chapel, which is the largest and most prominent of the late sixteenth-century chapels that line Santa Croce's side aisles.

For centuries, Vasari's *Lives of the Artists* (1550) has provided the most important information it holds regarding the history of Italian art and artists. Although recent studies, they have been subject

of his images of his own age good example of his sensitivity to images and ritual of Santa Croce's use carried out upon the between 1566 and 1572.

The Buonarroti Altarpiece's meanings, for Vasari and Michelangelo and Giambattista Tiepolo painter better known as one of Francesco Salviati

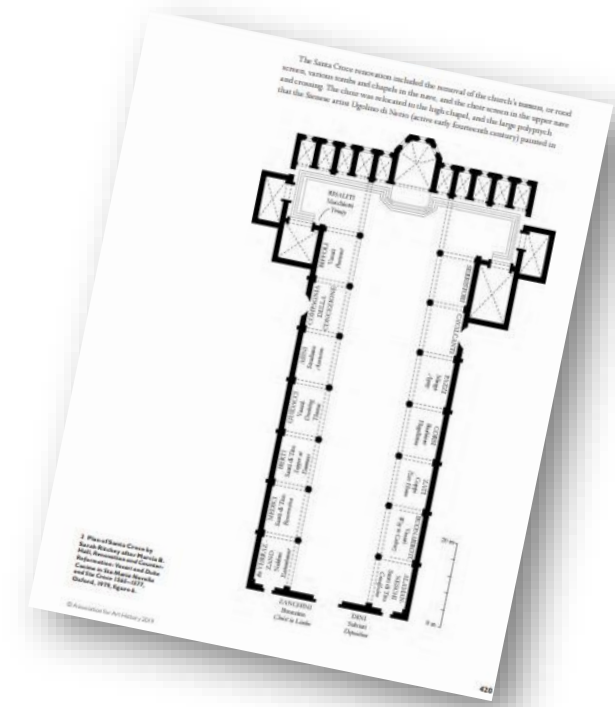

Detail of Giorgio Vasari, *Christ Carrying the Cross*, 1568–72 (plate 1).

Content, Context, and Vasari's Buonarroti Altarpiece

1 Giorgio Vasari, *Christ Carrying the Cross* (Buonarroti Altarpiece), 1568–72. Oil on panel, 420 × 270 cm. Florence: Buonarroti Chapel, Santa Croce. Photo: Archivio dell'Opera di Santa Croce, Ministero dell'Interno, Dipartimento per la Libertà Civile e l'Immigrazione, Direzione Centrale per l'Amministrazione del Fondo Edifici di Culto.

The Santa Croce renovation included the removal of the church's towers, or rocca, various vaults and chapels in the nave, and the choir screen on the upper nave and crossing. The choir was relocated to the high altar, and the large polyptych that the Swiss artist Ugolino di Nese (active early fourteenth century) painted in

Journal Impact Factor ⓘ

The Journal Impact Factor (JIF) is a journal-level metric calculated from data indexed in the Web of Science Core Collection. It should be used with careful attention to the many factors that influence citation rates, such as the volume of publication and citations characteristics of the subject area and type of journal. The Journal Impact Factor can complement expert opinion and informed peer review. In the case of academic evaluation for tenure, it is inappropriate to use a journal-level metric as a proxy measure for individual researchers, institutions, or articles. [Learn more](#)

Новые метрики и содержание

Figure 1
Journal Citation Indicator time period

Journal Citation Indicator новая нормализована по отраслям знаний метрика рассчитываемый для всех изданий WOS CC
Значение является нормализованным цитированием за трехлетний период.

Подробнее JCI [here](#).

Нормализованная средняя цитируемость по категории (CNCI)

Цитируемость публикации

$$\text{CNCI}_{\text{публикации}} = \frac{\text{Цитируемость публикации}}{\text{Средняя цитируемость всех публикаций *того же типа*, опубликованных *в том же году* и *в той же предметной области*}}$$

$$\text{CNCI}_{\text{группы публикаций}} = \frac{\text{CNCI}_1 + \text{CNCI}_2 + \dots + \text{CNCI}_N}{N}$$

$\text{CNCI}_{\text{публикации}} > 1$: исследование цитируется лучше среднемирового уровня

$\text{CNCI}_{\text{Казахстана}} < \text{CNCI}_{\text{публикации}} < 1$: исследование цитируется лучше, чем в среднем по Казахстану, но хуже, чем в среднем в мире

NB!

Журналы в нескольких категориях

Более 30 % журналов Web of Science расписаны несколькими категориям. Для ИФ, это позволяет сравнивать разные категории. Для CNCI с несколькими категориями, высчитывается среднее значение нормализованных показателей для всех категорий

Мультидисциплинарные журналы

Поскольку Journal Citation Indicator рассчитывается на уровне статей, данный показатель будет более корректным. Каждая публикация расписывается к определенной категории определяющим есть перечень литературы (любая более цитируется). Если трудно определить то сравнивается с мультидисциплинарной.

Ранний доступ

Journal Citation Indicator будет использовать ту же схему для раннего доступа что и для JIF

Не учитывается:

Не связанные цитирования (писем, редакторский заметок и т.п.) не учитываются

Journal Impact Factor and Journal Citation Indicator calculation

Journal Impact Factor

Journal Citation Indicator

Journal Citation Indicator & Journal Impact Factor

The **Journal Citation Indicator (JCI)** is designed to *complement* the Journal Impact Factor™ (JIF) – the original and longstanding metric for journal evaluation – and other metrics currently used in the research community. In addition to the use of normalization, there are several key differences between the JCI and the JIF, shown in this table:

Also, the JIF calculation is based on citations made in the current year, while the JCI counts citations from any time period following publication, up to the end of the current year.

Feature	Journal Impact Factor	Journal Citation Indicator
All Web of Science Core Collection journals	N	Y
Field-normalized citation metric	N	Y
Fixed dataset	Y	Y
Counts citations from the entire Core Collection	Y	Y
Counts citations from the current year only	Y	N
Includes Early Access (EA) content from 2020 onward	Y	Y
Includes unlinked citations	Y	N
Fractional counting	N	N

The JCI will bring citation impact metrics and providing this information will increase exposure to journals from all disciplines, helping users to understand how they compare to more established sources of scholarly content.

Journal Citation Reports

The screenshot shows the Clarivate Journal Citation Reports website. At the top left is the Clarivate logo. The main header includes "Journal Citation Reports" and "Browse journals". On the top right, there is a "Products" menu and a user profile for "iryna.tykhonkova@clarivate.com". The main content area has a purple background with the text "The world's leading journals and publisher-neutral data". Below this is a search bar with the placeholder text "Type journal name, ISSN, eISSN, category or a keyword" and a search icon. A white box below the search bar contains the text "Already have a manuscript?" and "Find relevant, reputable journals for potential publication of your research using Manuscript matcher.", along with a "Match my manuscript" button. At the bottom, there is a section titled "See full listings and refine your search" with four icons and labels: "Browse journals", "Browse categories" (with "COMING SOON" below), "Browse publishers" (with "COMING SOON" below), and "Browse countries" (with "COMING SOON" below). A question mark icon is in the bottom right corner.

Новый интерфейс

На демонстрации

The screenshot displays the Clarivate Journal Citation Reports interface. At the top, the Clarivate logo is on the left and 'Products' is on the right. The main header includes 'Journal Citation Reports' and 'Browse journals'. A user profile for 'iryna.tykhonkova@clarivate.com' is visible in the top right. The main content area shows '20,932 journals' and a search bar with the placeholder text 'Type journal name, ISSN, eISSN, category or a keyword'. An 'Export' button is located to the right of the search bar. Below the search bar, there is a 'Find in table' search icon, 'Indicators: Default' with a dropdown arrow, and a 'Customize' button with a gear icon. A filter sidebar is open on the left, showing 'Filter' with a close button and three categories: 'Journals (26,674)', 'Categories (254)', and 'Publishers (8,110)'. The main table displays journal data with the following columns: eISSN, Category, Total Citations, 2020 JIF, JIF Quartile, 2020 JCI, and % of Gol. The table contains three rows of data.

eISSN	Category	Total Citations	2020 JIF	JIF Quartile	2020 JCI	% of Gol

Journal Citation Indicator (JCI) ⓘ

Export

77.64

The Journal Citation Indicator (JCI) is the average Category Normalized Citation Impact (CNCI) of citable items (articles & reviews) published by a journal over a recent three year period. The average JCI in a category is 1. Journals with a JCI of 1.5 have 50% more citation impact than the average in that category. It may be used alongside other metrics to help you evaluate journals. [Learn more](#)

Total Citations

Export

55,868

The total number of times that a journal has been cited by all journals included in the database in the JCR year. Citations to journals listed in JCR are compiled annually from the JCR years combined database, regardless of which JCR edition lists the journal.

Citation distribution ⓘ

Export

The Citation Distribution shows the frequency with which items published in the year or two years prior were cited in the JCR data year (i.e., the component of the calculation of the JIF). The graph has similar functionality as the JIF Trend graph, including hover-over data descriptions for each data point, and an interactive legend where each data element's legend can be used as a toggle. You can view Articles, Reviews, or Non-Citable (other) items to the JIF numerator. [Learn more](#)

Eigenfactor Score

0.10514

The Eigenfactor Score is a reflection of the density of the network of citations around the journal using 5 years of cited content as cited by the Current Year. It considers both the number of citations and the source of those citations, so that highly cited sources will influence the network more than less cited sources. The Eigenfactor calculation does not include journal self-citations. [Learn more](#)

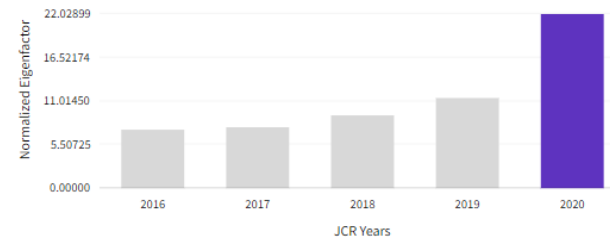

Normalized Eigenfactor

22.02899

The Normalized Eigenfactor Score is the Eigenfactor score normalized, by rescaling the total number of journals in the JCR each year, so that the average journal has a score of 1. Journals can then be compared and influence measured by their score relative to 1. [Learn more](#)

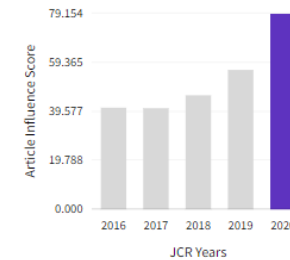

Article influence score

79.154

The Article Influence Score normalizes the Eigenfactor Score according to the cumulative size of the cited journal across the prior five years. The mean Article Influence Score for each article is 1.00. A score greater than 1.00 indicates that each article in the journal has above-average influence. [Learn more](#)

Immediacy Index

52.212

[View Calculation](#)

The Immediacy Index is the count of citations in the current year to the journal that reference content in

Browse, search, and explore journals indexed in the *Web of Science*

The *Master Journal List* is an invaluable tool to help you to find the right journal for your needs across multiple indices hosted on the *Web of Science* platform. Spanning all disciplines and regions, *Web of Science Core Collection* is at the heart of the *Web of Science* platform. Curated with care by an expert team of in-house editors, *Web of Science Core Collection* includes only journals that demonstrate high levels of editorial rigor and best practice. As well as the *Web of Science Core Collection*, you can search across the following specialty collections: *Biological Abstracts*, *BIOSIS Previews*, *Zoological Record*, and *Current Contents Connect*, as well as the *Chemical Information* pro

The screenshot shows the homepage of the Master Journal List website. The browser address bar displays 'mjl.clarivate.com/home'. The website header includes the 'Web of Science Group' logo, the 'Master Journal List' title, and navigation links for 'Search Journals', 'Match Manuscript', 'Downloads', and 'Help Center'. There are also 'Login' and 'Create Free Account' buttons. The main content area features a dark blue background with white text that reads: 'Browse, search, and explore journals indexed in the Web of Science'. Below this, a paragraph describes the Master Journal List as an invaluable tool for finding journals across multiple indices. At the bottom, there is a search bar with the placeholder text 'Search Journal, ISSN or title word...' and a 'Search Journals' button. Additionally, there is a section titled 'Already have a manuscript?' with a 'Match Manuscript' button.
